

Ivan Bogdanov

+358 46 6876662 | ivan@bogdanov.io | Vantaa, Finland | [LinkedIn](#) | [GitHub](#) | [Website](#)

Summary: A high-quality specialist with 5+ years of experience in full-stack web development and a strong engineering background. Focused on backend technologies such as C# and proficient in JavaScript for frontend development, leveraging .NET and React to craft responsive user interfaces and ensure seamless interactions. Possesses a strong foundation in building RESTful APIs, optimizing database queries, and developing robust, scalable systems across industries such as e-commerce, educational technology, and spatial data. A dedicated team player who applies Agile methodology to collaborate effectively with cross-functional teams as well as work independently as an autonomous developer.

SKILLS

Backend Development: C#, ASP.Net, EF Core, EF Identity, Node.JS

Frontend Development: JavaScript, TypeScript, React, Redux, Next.JS, Angular

Database Management: SQL, MS SQL, PostgreSQL, TileDB, Parquet

Miscellaneous: Amazon AWS, Docker, Azure DevOps, GitHub Actions, Jira, REST, SOLID, Agile

Soft Skills: Team player, Problem Solving, Critical thinking, Communicative, Collaborative

Languages: Finnish (A1), English (C1), Russian (Native)

EXPERIENCE

FULLSTACK DEVELOPER | Freelancer

Several companies | Finland, remote | February 2025 – Present time

- **STOCO:** Designed and implemented a scalable CRM application as a SaaS platform for B2B sales in the stone industry, automating tender and procurement processes using React-Next with MUI and Domain-Driven Design principles.
- **BeFreeNow:** Developed a responsive website and admin panel for a financial company using WordPress, PHP, and Stripe, improving user experience and operational efficiency.
- **Notos Oy:** Built a responsive website with React frontend and PHP backend, enhancing client engagement and maintainability.

SOFTWARE DEVELOPER | Full-time contractor

SWD Factory | Latvia, remote | August 2024 – January 2025 (lay off)

- Implemented new features and resolved bugs for a distributed cloud-based application that helps Spatial Biology scientists conduct various studies, analyze and share test results.
- Optimized the handling of large data sets for the frontend by implementing a backend service to transfer data from TileDB to Parquet files. Prevented out-of-memory exceptions on the server and reduced processing time by 5 times through intermediate data storage in memory using efficient data structures.
- Maintained automated deployment workflows leveraging AWS infrastructure and Azure DevOps.
- Technologies used: C#, TypeScript, ASP.Net, Angular, Angular Material, EF Core, PostgreSQL, TileDB, Parquet, Kafka, Docker, Kubernetes, AWS, Azure DevOps.

FULLSTACK DEVELOPER | Full-time

Lans Group LLC | Russia, remote | June 2023 – August 2024 (fixed term contract)

- Automated the managers' workflow with clients by creating an e-commerce B2C web platform with features such as personal account creation, online order payments, blogging and etc.
- Automated ad placement on the website that replaced the manual process.
- Improved usability for customer by implementing an administrative panel as the CMS, which allows for website customization without a developer.
- Incorporated the capability for modular integration of CMS application components, allowing my customer to utilize only the modules he requires, thus conserving computational resources and saving costs in the long run.
- Technologies used: C#, TypeScript, ASP.Net Core, Razor, React, PostgreSQL, Fluent Migrator, MediatR.

JUNIOR C# DEVELOPER | Full-time

GEEKBRAINS | Saint-Petersburg, Russia | May 2021 – June 2023

- Implemented over 10 new features for educational online platform, such as send-message service, server metrics service, and timesheets service, improving system performance and user satisfaction, and allowing the company to attract more customers (new students).
- Provided unit tests for all new features ensuring product quality and reliability, and contributing to CI/CD as well.
- Technologies used: C#, .Net Core, Entity Framework, Fluent Migrator, MSSQL, Swagger, Git, Scrum

LEAD DESIGN ENGINEER | Full-time

PJSC SEVERSTAL | Saint-Petersburg, Russia | June 2013 – September 2022

In addition to performing my primary duties as a design engineer over the past two years:

- Reduced manual workload in engineering workflows from days to hours by building C# plugins for CAD tools (Revit).
- Enhanced automation of workflow processes through communication and collaboration with the IT department and by using Power BI with SAP.

EDUCATION

University of Continuing Professional Education | Saint-Petersburg, Russia

Information and Communication Technologies | Bachelor's Degree | 06/2023

State University of Architecture and Civil Engineering | Saint-Petersburg, Russia

Civil Engineering | Master's Degree | 06/2012

COURSES AND TRAINING

Building AI Leveraging Python

University of Helsinki | 08.2025

Building RESTful APIs with Node.js and Express

Linkedin Learning | 03.2025

ADDITIONAL INFORMATION

Honors & awards:

- A winner in offline hackathon "Talent Hack Day" (03/2025);
- 3rd place in online hackathon "Soglasie" (10/2024);
- 4th place and judge's sympathy award in online hackathon "What's the Hack?" (08/2024).
